

Economizing not only helps the environment
but also saves your money

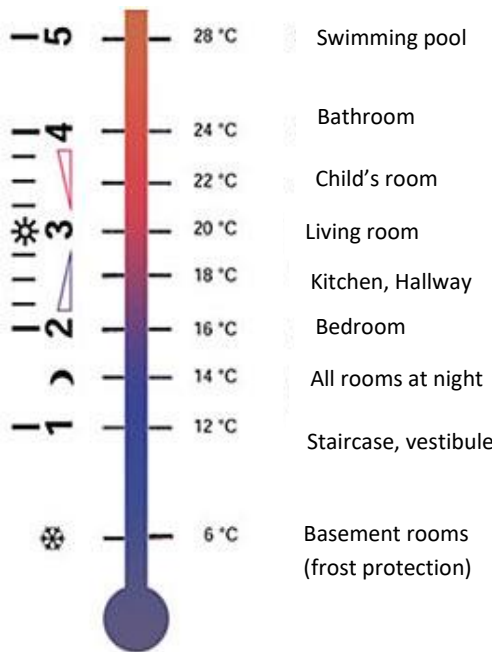

The expenses for electricity and water of the entire dormitory are allocated among all the tenants by a fixed rate, which is adjusted anew every year. As soon as there is reduction, this can be given on to the students. This means a motivation for you personally to conserve energy and to go easy with resources whenever possible.

Tell your fellow tenants – because you are paying for their wrongdoing!!!

Save heating costs

Airing correctly

Average duration of the change of air depending on the opening of door and window

- 2 min. (door and window open)
- 10 min. (door open, window closed)
- 60 min. (door closed, window open)

➤ **2 – 3 times a day**

Save water

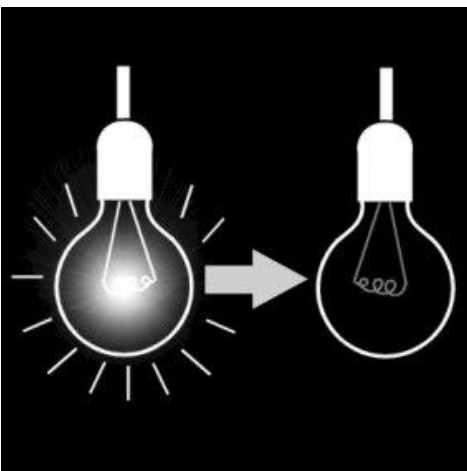

- Shower for max 5 min

Save electricity

- Switch all electronic devices off! (No standby!!)

- Turn off the lights when not needed!

Bottom line: With the conscious handling of energy and water you can save a lot of money and do the environment a huge favor!
